Each teacher is assigned around 25-30 students for the complete duration of their study. • the college organized a meeting with students at least ones a month to discuss resolve various problems. • The mentors encourage the students to participate in co-curricular and extracurricular activities and sports. • Their academic performance and other activities are all recorded. • The mentors also keep in touch with the parents/ guardians on their attendance, test performance, fee payment, examinations etc on weekly basis • The mentors also counsel the students in need of emotional problems. • When the students face any problem in any department/college either with the staff or work completion the mentors speak with the respective staff and sorts out the problem. • Mentors take special care of weak students, in study doubts etc. • Chief Mentor of department takes the progress of counselling of students by mentors. • Students problems are discussed with the departmental heads, other faculties and necessary action taken to solve it. Students undergo various problems of stress- personal, academic, physical, mental. Students are new in professional course faces a lot of stress, specially hostel students who are away from family for the first time. Students from educationally weak background feel complex and hesitations in class and unable to perform well due to inhibitions. Statistics reveal increasing number of suicides and dropouts. Considering the student-teacher ratio in classrooms, it is difficult at times to give personal attention to students in class. One solution therefore is a 'Mentor' who can form the bond with students in the true sense. Mentoring is required for students to achieve emotional stability and to promote clarity in thinking and decision making for overall progress.

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

An environment that facilitates individual commitment to student academic success in a environment that values plurality and community. According to the new education policy, along with the knowledge of the students, they also pay attention to their health and skill development and connect the knowledge with their real life. Different student have different cognitive abilities and learning styles, which is why they think and behave differently and also do analysis differently and take decisions accordingly. We need to know the learning needs of children before providing them with learning experience, only then we use different types of learning objectives for the students. Those students who cannot go on excursion study tour should be shown the scenes on which the lesion is being studied through projector, laptop or smart class. So that the child does not feel boring in his studies with pleasure. Through group discussion we provide opportunities to the students based on their text book. So that the child understands his lesson through his experiences with each other. At the same time, the child not thinks about his own learning process, but also realize how to do better next time, and will also try to improve his learning processes. By making the lesson interestingly through the medium of plays, we create curiosity in the students to know the information/knowledge about the lesson. We think about what the child can do and cannot do. We conduct studies keeping in mind that through which medium students find it more interestingly to teach/learn so that the students will be active to achieve their goals. Both the students and the teacher are determined to achieve their goals. For which definitely the teacher keeps on making some adjustments and changes in his studies to meet the needs of the students. That's why our education policy is to believe in imparting education considering the child as the center for the all-round development of the students.
